Professional Summary

I'm a DevOps Engineer at Accenture, specializing in CI/CD automation, Kubernetes orchestration, and cloud infrastructure. I design and maintain enterprise-grade deployment pipelines for Kaiser Permanente using GitHub Actions, Azure, and AWS. Expert in Python automation scripting, container orchestration (Kubernetes/AKS), and Linux administration with a proven track record of delivering 99.9% uptime and optimizing deployment workflows for healthcare systems.

Technical Strengths

- **Devops & CICD:** GitHub Actions CI/CD pipelines (Certified), Python/Bash scripting for DevOps automation, and GitOps workflows.
- **AWS & Cloud:** Solid proficiency in AWS ecosystem (EC2, S3, IAM, Lambda, CloudWatch, Auto Scaling), Multi-cloud infrastructure management and Infrastructure provisioning and AWS resource optimization.
- **Container & Orchestration:** Kubernetes deployment, management and multienvironment orchestration. AKS cluster administration and scaling.
- **Cloud & Infrastructure:** Azure cloud infrastructure (AKS, Blob Storage, Queue Storage, resource management), Infrastructure automation and multi-environment deployment, Cost optimization and resource provisioning.
- **Linux & System Administration:** Linux administration, shell scripting, production troubleshooting, and deployment reliability (99.9% uptime).

Professional Experience

Accenture – Software Development Engineer (Sep 2024 – Present)

- **Architected and maintained** end-to-end CI/CD pipelines using **GitHub Actions** for Kaiser Permanente, ensuring seamless deployment for large-scale healthcare applications.
- **Engineered custom Python scripts** to automate workflow debugging, reducing pipeline failure resolution time and improving deployment reliability.
- **Implemented secure DevSecOps practices** within GitHub workflows to identify and resolve vulnerabilities during the CI/CD lifecycle for enterprise-grade software.
- **Collaborated on troubleshooting** complex distributed system failures, utilizing strong analytical skills to maintain 99.9% uptime for production pipelines.

- **Optimized cloud-based workflows** by leveraging **AWS services** and **Linux administration**, ensuring high availability for critical client environments
- Investigated and resolved over 20 unique workflow failovers, improving system stability and reducing manual intervention by 35% weekly.

Education

Bannari Amman Institute of Technology | 2020 – 2024

- **Degree:** Bachelor of Technology in Artificial Intelligence & Data Science
- **Academic Standing:** CGPA: 8.35/10.0
- **Core Coursework:** Data Structures & Algorithms, Artificial Intelligence, Data Science and Machine Learning, Operating Systems, and Distributed Computing.

Achievements

- **Industry Recognition:** Earned the **Microsoft GitHub Actions Certification**, validating expertise in enterprise-level CI/CD automation and DevSecOps workflows.
